

CAPABILITY STATEMENT

Cloud engineering, infrastructure automation, and documentation systems for federal agencies and prime contractors.

COMPANY OVERVIEW

JDX Software LLC is a Service-Disabled Veteran-Owned Small Business founded by a U.S. Air Force veteran and cloud engineer with direct experience supporting federal programs. We specialize in cloud infrastructure, DevOps automation, and operational documentation for agencies and prime contractors in secure environments. We hold an active TS/SCI clearance and are ready to support classified programs without onboarding delays.

CORE COMPETENCIES

- ▶ **Cloud Engineering** — Design, deploy, and manage cloud infrastructure in Azure and AWS. IAM, virtual networking, and security configurations built to federal compliance standards.
- ▶ **Infrastructure Automation** — Infrastructure as code, CI/CD pipelines, and configuration management that reduce deployment errors and improve operational consistency.
- ▶ **Secure System Design** — Architecture and deployment for secure and air-gapped environments. Cleared to support classified programs without onboarding delays.
- ▶ **Documentation & SOP Standardization** — Standardize procedures with Manualize, our documentation platform. Reduces documentation time, ensures compliance readiness, and eliminates knowledge-loss risk.

PAST PERFORMANCE

Enterprise Cloud Infrastructure

Supported cloud migration and deployment automation in federal environments. Implemented IaC solutions reducing provisioning time by 80% and eliminating configuration drift across multi-region deployments.

Technical Documentation Systems

Built Manualize, a platform converting workflows into standardized SOPs. Reduced documentation creation time by 70% in environments where missing procedures created compliance risk.

Operational Automation

Deployed CI/CD pipelines and automated monitoring for mission-critical systems, improving deployment consistency and reducing incident response time across distributed teams.

DIFFERENTIATORS

- **SDVOSB Certified** — Eligible for sole-source and set-aside contracts under the SDVOSB program.
- **Active TS/SCI** — Ready for classified programs without clearance processing delays.
- **Engineering + Documentation** — Build systems and document them. Reduces handoff risk, accelerates ATO.
- **Veteran-Led** — Founded by a U.S. Air Force veteran with federal operations experience.

CERTIFICATIONS & CREDENTIALS

SDVOSB	SBA Certified
Security+	DoD 8570 IAT II
Network+	CompTIA
TS/SCI	Active

CORPORATE DATA

UEI	UQHPVJCKGBT3
CAGE	15VV3
SAM Status	Active

NAICS CODES

541512	Systems Design (Primary)
541511	Custom Programming
541519	Other Computer Related
518210	Data Processing / Cloud

PSC CODES

DA10	DA01	DE01	DE02	DE10	DE11
